

MAUDE TANSWAI

Auto-Anamnesis, Part I

Lexicon of a Truant Mind Body Assemblage (A Harvest)

Harrow and thresh the intervening spaces.

::dissect::

a lifetime of pattern recognition. a nocturnal trait. a pathognomonic sign.

a compulsion

systemic and wolflike. swelling in vivo...in *this vivo*, signaling the time for raised hairs. distally oriented and ever susceptible. measuring sensitivities and imposing suppression. marking the usual identifiers

relentlessly.

::infiltrate::

the tension of perception, of misgiving, of disquiet, of foreboding and alarm. the comfort of familiar angst. an obvious premonition foretold. an ominous anticipation unfolds. tension begetting tension begetting tension begetting tension begets release.

::transgress::

with clouded mentation raw angry flesh exposed oozing and laid bare to a (sidesplitting) collective gasp. comicality beyond measure. beyond chagrin.

The indignity of being:

persistent, edematous, quiescent & necrotic

Pareidolic articulation *through a thousand corroded wounds.*

Auto-Anamnesis, Part II

Lexicon of a Plenary Body Mind Assemblage (A Resolution)

Harrow and thresh the filamental.

::chelate::

a lifetime of encounters, of informed consent, of assumed risks, of tracing antibodies and waiving rights, while unknown processes persist under aseptic military rule.

::reconcile::

foreign bodies, limbic tension, shrouded deformities, nonsense-mediated decay, and the value of sedimentation. where prototypical morphinian effects meet the fixed ends of opiophagy.

::remediate::

proselytized pathology and ritualized pain. excise sanguineous sideways glances. exorcize the catechized free radicals. ramify the thews and sinews. infuse light intracellular.

then alkalinize this heart beyond a specific gravity
and flow silent beyond belief

The sudden dignity of being:

delicate, delightful, paroxysmal, fluid & clear

Sphoṭa from *wounds of experience*.
