

I broke open This was hard work,

Do not be squeamish at what happens Nex: T

It is added: she trembled till she shook the house,

with snakes coiled she descended into hell

she, I a great lover of the open light of day.

a Plumy Bleed-  
on the point of the heart-piece,  
one tooth of a star  
no  
a wheel of sixty teeth.

we have met before  
consisting of shadow s  
and deep snow in between,

This brings us to latitude  
scent of the wind.

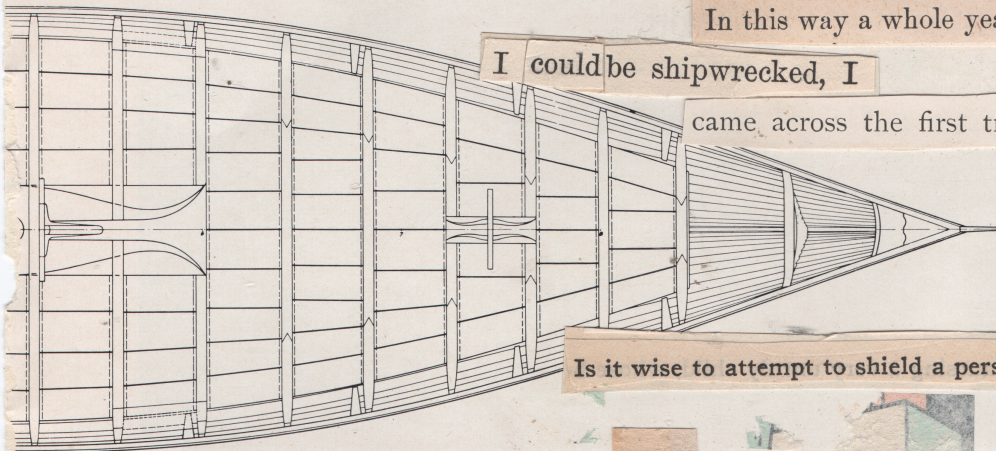

I write: "I climbed to the top  
I measured it roughly,

bits of paper  
leaves leaves  
paper.

In this way a whole year went by,

I could be shipwrecked, I

came across the first tracks of bears

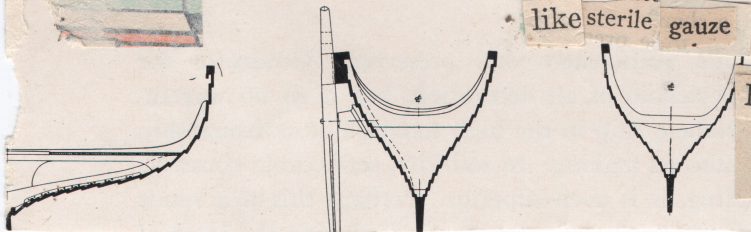

Is it wise to attempt to shield a person from worry.?

one day a letter came

like sterile gauze

like A  
propeller  
under water

And this year too is vanishing.  
One might fall ill  
with longing

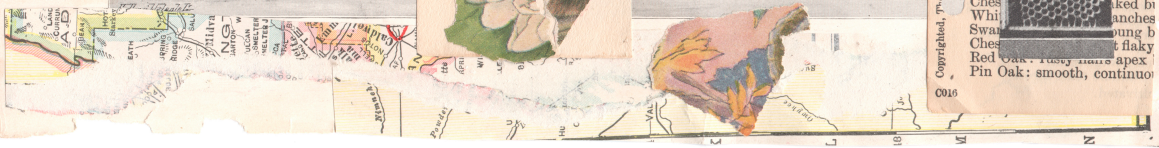

an old word meaning  
Our church-bell is the wind  
which disappears again.  
to waste time dwell on The trouble  
that rises above us,

We live at the bottom of an ocean  
no life boats are lowered.

Silver

# SOUTH POLAR REGIONS

THE GEORGE F. CRAM COMPANY  
Atlas Headquarters—Est. 1867  
CHICAGO

I may die or become wholly external  
I'll be too much  
crosswise in every direction.  
I may mention weapons,  
quake, thunderstorm,  
"breaks" infection,  
We all take chances,  
take refuge in  
weakness  
we are lost  
setting fire to found  
to those for whom  
the approach of danger  
finally dawned  
I have recently heard  
a hole in the dam.

NOTE:  
Victoria South Sea  
ROSS BAY  
COLUMAN I.  
BEAUFORT I.  
ROSS IS.  
ICE BARRIER  
SOUTH POLE

NOTE:  
Capt. Scott and his com-  
rades left the pole by a route  
turning from the pole by a route  
11 miles from the pole, died of ex-  
haustion March 29, 1912.

NOTE:  
The great ice-tempered cable-  
line is estimated to have an  
average thickness of 1000 to  
1500 feet and is estimated to  
extend from the pole to the  
equator of the earth.
